

# SIVADATH AJAYAN

sivadathvaliyavila@gmail.com | +91 8304874459 | Kerala, India | [linkedin.com/in/sivadath-ajayan](https://www.linkedin.com/in/sivadath-ajayan) | [github.com/t3xture-op](https://github.com/t3xture-op) | [sivadath-ajayan.vercel.app](https://sivadath-ajayan.vercel.app)

## PROFESSIONAL SUMMARY

---

BCA graduate (May 2026) with hands-on experience in cybersecurity fundamentals, AI/ML engineering, and full-stack web development. Skilled in SOC workflows, threat detection, SIEM concepts, and MITRE ATT&CK framework. Experienced in building ML pipelines and computer vision systems, and in developing end-to-end web applications using the MERN stack. Holds certifications in cybersecurity, cloud, and AI/ML. Actively practicing on TryHackMe. Seeking an entry-level role in cybersecurity, AI/ML, or software engineering.

## TECHNICAL SKILLS

---

**Cybersecurity:** SOC Fundamentals, SIEM Concepts, MITRE ATT&CK, Threat Detection & Analysis, Log Analysis, Network Security, Linux Security, TryHackMe (active)

**AI / ML:** Python, scikit-learn, OpenCV, Pandas, NumPy, Computer Vision, ML Pipeline Automation, Data Preprocessing

**Frontend:** React.js, HTML5, CSS3, JavaScript (ES6+), Responsive Web Design, Vue.js (basic), Vite

**Backend & APIs:** Node.js, Express.js, REST API Development & Integration

**Databases:** MongoDB, MySQL, Database Schema Design

**Cloud & DevOps:** AWS (EC2, S3), GCP (basic), Linux, Bash Scripting, Git, GitHub

**Other Languages:** Go (basic), C++ (basic)

**Concepts:** MERN Stack, MVC Pattern, TDD Concepts, Agile, Technical Documentation

## PROFESSIONAL EXPERIENCE

---

### AI and Machine Learning Intern — ICT Academy of Kerala, Trivandrum

December 26, 2025 – January 31, 2026

- Developed and maintained Python-based ML pipeline scripts with modular, reusable code structures aligned with clean code and documentation best practices.
- Worked on automated ML workflows including data preprocessing, model training, and performance evaluation using Python, Pandas, and scikit-learn.
- Collaborated with a cross-functional team of engineers and analysts, contributing to 10+ workshops covering AI/ML methodologies and emerging tools.
- Documented experiment workflows and technical outcomes, maintaining structured project records for team-wide knowledge transfer and reproducibility.

## PROJECTS

---

### MalWatch — Cybersecurity Threat Detection Tool | Python | 2024

GitHub: [github.com/t3xture-op](https://github.com/t3xture-op)

- Built a Python-based malware detection and monitoring tool applying threat analysis concepts and security-focused scripting practices.
- Implemented log parsing, behavioral pattern analysis, and alert generation to simulate SOC-level threat detection workflows.
- Applied knowledge of MITRE ATT&CK; tactics to structure detection logic around real-world adversary techniques.

### AI-Enabled Attendance System — Python + Computer Vision | 2024

GitHub: [github.com/t3xture-op](https://github.com/t3xture-op)

- Engineered an end-to-end automated face recognition attendance system using Python and OpenCV, achieving ~92% accuracy across varied lighting and environmental conditions.
- Designed a modular pipeline architecture with clearly separated stages (capture, preprocessing, inference) following software engineering best practices.
- Reduced manual attendance processing time by 40% for a class of 30+ students through full automation and iterative model optimization.
- Integrated a backend data layer for structured attendance record storage and retrieval.

## **Anand Medicals E-Commerce Platform — Full Stack MERN | 2023**

GitHub: [github.com/t3xture-op](https://github.com/t3xture-op)

- Built a fully functional, responsive e-commerce web application using the MERN stack (MongoDB, Express.js, React.js, Node.js), serving 100+ product listings across devices.
- Designed and integrated 15+ RESTful API endpoints for product catalog, cart, and order management.
- Applied CSS and JavaScript best practices for cross-device compatibility; optimized frontend performance to reduce average page load time.
- Managed the full development lifecycle using Git with branching strategies and clean version history.

## **EDUCATION**

---

### **Bachelor of Computer Applications (BCA) — College of Applied Science, Adoor**

University of Kerala | Graduated May 2026

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Computer Networks, Operating Systems, Software Engineering, Web Technologies

### **Higher Secondary Certificate — Computer Science**

Government HSS, Kottarakkara | 2021 – 2023

## **CERTIFICATIONS**

---

- Foundations of Cybersecurity — Google / Coursera
- AI and Machine Learning Certification — ICT Academy of Kerala
- AWS Cloud Practitioner with Hands-on Labs — KodeKloud
- Shell Scripting Certification — KodeKloud

## **LANGUAGES**

---

Malayalam (Fluent) | English (Professional) | Hindi (Conversational)
